

Be Safe with Ice Melt Options

Be prepared to keep your steps, sidewalks, driveways, roadways, and parking lots safer and ice-free. At Lurvey we have a variety of ice melt options to meet your needs regardless if you are trying to de-ice your home or large business parking lot. We can help if you're dealing with higher temperatures or subzero temperatures.

Rock Salt (sodium chloride): Among the least expensive products you'll find that melts the ice, but it's also among the harshest things you can apply for both your hardscape and softscape. It can be safe on pavers and natural stones when used in temperatures at or above 15 degrees Fahrenheit. At any temperature lower, rock salt begins to become ineffective. Also, when melting and refreezing is a concern, it is not best for pavers and natural stone because if the melted solution enters the porous stone and refreezes, it is at risk for spalling and cracking. Sodium chloride can be harmful to softscapes, because when it dissolves, it can burn the grass and shallow roots of trees, shrubs and perennials.

Calcium Chloride: Excellent for paver driveway and walkways. This product is extremely fast acting as it begins melting ice on contact. This product works at the lowest temperature range and almost completely eliminates the chances of refreezing! These characteristics make it one of the best products to use on concrete and natural stone.

We carry a selection of ice melts options in bags that are appropriate for many situations. Treated rock salt is available by the ton, in bulk.

See our complete list on the next page!

Rock Salt / Treated Sodium Chloride

50 lb bags, 49/skid; 882/truck

Melts to 5 degrees F

Rock Salt / 'BLUE' Sodium Chloride

Dyed royal blue and treated with anti-caking agent

50 lb bags, 49/skid; 882/truck

Melts to 5 degrees F

Pro-Slicer - Sodium Chloride Blend

Treated with a calcium chloride corn based wetting agent

Tinted purple color

50 lb bags, 49/skid; 882/truck

Melts to -20 degrees F

Lightening Premium Ice Melter

Organic carbohydrate acts as a lubricant allowing free flowing through spreaders

50 lb bags, 49/skid; 882 per truck

Tinted aqua color

Melts to -20 degrees F

Sizzle Lite Ice Melter

ASTM grade rock salt treated with Calcium Chloride, organic carbohydrate and a corrosion inhibitor coating

50 lb bags, 49/skid; 882 per truck

Tinted violet color

Melts to -16 degrees F

Sizzle Professional Ice Melter

Optimum blend of Calcium Chloride and premium sized Sodium Chloride

50 lb bags, 49/skid; 882 per truck

Lavender in color with white pellets

Melts to -25 degrees F

Peladow Calcium Chloride Pellets

50 lb bags, 55/skid; 990 truck

Melts to -25 degrees F
