

Skylands™ Concrete Deck Pavers

Skylands™ Concrete Deck Pavers

Raise the status of your roof or patio area with Skylands™ Concrete Deck Pavers. Adjustable pedestals allow for easy installation and can turn pitched roofs into a flat usable surface. Skylands™ units are lighter than the industry average; the 24" x 24" x 2" slabs are 24lbs/sq. ft. Building owners are turning to concrete deck pavers for enhancing previously unusable spaces because of their many advantages:

- Prevents water damage with open joints
- Lengthens roof membrane lifespan by stopping harmful UV rays
- Seamlessly integrates with green roof features
- Roof components below slabs are easily accessible

For on grade applications

* Textured paver and patio stone surfaces require a buffer between the plate compactor and the paver surface to prevent scuffing. Refer to County Materials' Interlocking Concrete Paver or Slab Installation Guidelines, or contact County Materials for information.
