CONCRETE DECK PAVERS

Uses and Applications

County Materials' Skylands™ Concrete Deck Pavers were designed as a response to the challenge that architects and designers face when creating a functional, aesthetically pleasing space with materials that can withstand constant exposure to the elements.

Using pedestals, the pavers create level, uniform and safe walking spaces out of otherwise uneven, pitched or irregular areas. There are several areas where using County Materials' Skylands™ Concrete Deck Pavers makes the most of otherwise unusable areas.

A few options include:

- Rooftops
- Gravel courtyards
- Terraces
- Balconies
- Plazas
- Garden walkways
- Amenity decks

NEW Product! Introducing Glow Path Technology™

Glow Path Technology™ enhances the safety and aesthetics of residential, commercial, and municipal paver applications by providing subtle illumination that lasts up to 8 hours. All Skylands Colors are available with Glow Path Technology as Made to Order. Contact your Sales Representative for availability and lead times.

Daylight

Evening

The color photos shown in this catalog were prepared with careful attention to accuracy. However, colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete units are manufactured with high quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry.

Skylands

CONCRETE DECK PAVERS

High Value Benefits

The greatest benefit of Skylands™ Concrete Deck Pavers is that they allow safe, usable and attractive spaces to be created out of otherwise dangerous or unusable areas. For condos or apartment buildings, this adds a high value feature and attracts more tenants. It's also great for rooftop bars or restaurants, entertaining spaces or community areas.

Additional Benefits Include:

- Large units make for speedy installation.
- Pedestals create uniform spacing between units - allowing storm water to flow to drains.
- Can be easily removed paver by paver for roof maintenance.
- Double the expectancy of roofing membrane by protecting against UV rays and abrasive weather.
- Each unit is designed to meet industry standards, withstand the wear and tear of high traffic areas.
- Each unit is manufactured to meet ASTM C1491 Standards for Flexural Strength, Absorption and Freeze Thaw Durability.

Skylands Concrete Deck Pavers – TIMELESS and SERENITY

COUNTY MATERIALS CORPORATION

Skylands Concrete Deck Pavers – TIMELESS color

Manufactured with County Materials’ Genesis Face-Mix Technology™

Skylands™ Concrete Deck Pavers are manufactured using County Materials’ Genesis Face-Mix Technology™ to craft each paver with a refined surface and integrally-blended high-strength concrete mix. This process results in vibrant, attractive, and long-lasting colors without compromising the quality or durability of the product itself. Each unit is designed to meet industry standards, withstand the wear and tear of high traffic areas, and create one-of-a-kind outdoor living and gathering spaces.

Skylands

CONCRETE DECK PAVERS

Great for Green Spaces

As sustainable building features grow in popularity, many architects are faced with the goal of creating sustainable, safe, and usable spaces. Green rooftops and plazas in particular have become a popular trend in commercial and residential projects. Green rooftops take heat producing areas and turn them into a cooler environment, reducing the heat island effect. Skylands™ Concrete Deck Pavers are designed to improve rooftop spaces and are a great addition to any green rooftop.

With the use of Skylands™ Concrete Deck Pavers, commercial or residential building architects can create safe, level walkways that can lead to garden beds, vegetation or growing mediums. Their pedestals create a uniform spacing between units to allow storm water to flow unimpeded to drains where it is channeled away from the paver's surface. The Skylands Pavers' elevated height leaves room for irrigation pipes to be installed under the paver.

See our **Landscape Products Specifications Guide** for more information on product specifications, care & maintenance, installation, and more.
